Subject: **Subject Under Investigation**

Case classification: case_c_general_public

SECTION 1 — Executive Summary

Media classified as likely synthetically manipulated based on 7 forensic indicator(s), including 4 high-severity finding(s).

Legal routing: General political/public figure (Subject Under Investigation) — standard cyber crime and intermediary notices. Deepfake grounds: Audio–video lip movement is misaligned, consistent with synthetic dubbing or post-hoc voice replacem; Spatial facial inconsistencies detected across frames suggest GAN or deepfake-based facial manipulat; 3D face mesh landmarks are unstable across the temporal sequence, indicating inconsistent facial geo

Intermediary takedown window: 3 hours (deadline 03-06-2026 18:29:15 IST)

Grounds for Deepfake Classification

Summary: Media classified as likely synthetically manipulated based on 7 forensic indicator(s), including 4 high-severity finding(s).

- Audio-Video Sync (critical):** Audio–video lip movement is misaligned, consistent with synthetic dubbing or post-hoc voice replacement rather than naturally captured speech.
(lip_sync_alignment_error_ms: 138.0 ms)
- Facial Manipulation (high):** Spatial facial inconsistencies detected across frames suggest GAN or deepfake-based facial manipulation. *(spatial_cnn_manipulation_probability: 94.00%)*
- 3D Face Geometry (medium):** 3D face mesh landmarks are unstable across the temporal sequence, indicating inconsistent facial geometry typical of synthetic faces.

(face_mesh_landmark_variance: 0.0890)

- **Synthetic Voice (high):** The voice track exhibits characteristics consistent with text-to-speech or neural voice cloning rather than a live recording. *(tts_synthetic_probability: 89.00%)*
- **Voice Authenticity (medium):** Pitch contour and spectrogram features do not match natural speech patterns for the apparent speaker, suggesting audio synthesis or splicing. *(spectrogram_pitch_mismatch_ratio: 46.00%)*
- **Anti-Spoofing (high):** Anti-spoofing neural network assigns low confidence to bona fide speech, indicating the audio is likely non-genuine or heavily processed. *(anti_spoofing_nn_confidence: 8.00%)*
- **Analyst Observation (medium):** Auto-generated from BharatShield detection. CNN=0.9400, FFT=0.8900, Verdict=Fake

SECTION 6 — Grounds for Deepfake Classification

See detailed findings above. This media exhibits indicators consistent with synthetic generation under multi-modal forensic analysis.

SECTION 7 — Regulatory Notices & Complaints (Summary)

IT Amendment Rules, 2026: Intermediary takedown notice required within 3 hours under Rule 3(1)(b).

Cyber crime: FIR recommended under BNS for cheating by personation, forgery, and defamation.

SECTION 8 — Chain of Custody Statement

The original electronic record, forensic analysis outputs, and this compiled packet are sealed with cryptographic hashes. Any alteration invalidates the bundle hash recorded in the audit log and eSakshya metadata.
