

GOVERNMENT OF INDIA	DRAFT FIR SUPPORT REPORT
BharatShield National Deepfake Detection and Response Platform	Reference No.: FSR-b4226ca5
RESTRICTED – LAW ENFORCEMENT USE ONLY	

First Information Report (Draft Support)

Evidentiary Report for Registration of FIR · Bharatiya Nyaya Sanhita 2023

To	Officer-in-Charge, Cyber Crime Police Station / Local Police Station
Victim / Personated	Shri Demo Politician
Electronic Record Hash	b94d27b9934d3e08a52e52d7da7dae55cfe5f806fb7c93f00039b7c69b6c4220
Date	04 June 2026
Reference Reference	FSR-b4226ca5

1. DETAILS OF VICTIM / PERSONATED SUBJECT

RESOLVED SUBJECT BIOMETRICS & IDENTITY PROFILE

Match Status	RESOLVED / BIOMETRIC MATCH DETECTED
Resolved Subject Name	Shri Demo Politician
Aadhaar Number (Masked)	XXXX-XXXX-7890
Gender	Female
Electoral Role	active_candidate
Constituency	Demo Lok Sabha Constituency
Party Affiliation	Demo National Party
Active Candidacy (MCC)	Yes
Face Cosine Similarity	100.0000%
Voice Cosine Similarity	100.0000%
Fused Confidence Score	100.0000%
Verification Source	hybrid

2. APPLICABLE SECTIONS AND OFFENCES

Based on multi-modal AI verification and statutory rules, the following offences are disclosed under the Bharatiya Nyaya Sanhita (BNS) 2023 and the Information Technology Act, 2000:

- **Representation of the People Act, 1951 Sec 123(4):** Corrupt practice to prejudice an election through false statements
- **Bharatiya Nyaya Sanhita, 2023 Sec 356:** Criminal defamation through morphed/synthetic media
- **Bharatiya Nyaya Sanhita, 2023 Sec 336:** Forgery of electronic records to cheat

3. FORENSIC DEEPFAKE ANALYSIS SUMMARY

Visual Manipulation Probability	92.00%
Voice Synthetic Probability	88.00%
Forensic Recommendation	Immediate registration of FIR and service of takedown to intermediary

4. GROUNDS FOR DEEPFAKE CLASSIFICATION

Summary: Media classified as likely synthetically manipulated based on 12 forensic indicator(s), including 4 high-severity finding(s).

- **Audio-Video Sync (CRITICAL):** Audio–video lip movement is misaligned, consistent with synthetic dubbing or post-hoc voice replacement rather than naturally captured speech.
- **Facial Manipulation (HIGH):** Spatial facial inconsistencies detected across frames suggest GAN or deepfake-based facial manipulation.
- **3D Face Geometry (MEDIUM):** 3D face mesh landmarks are unstable across the temporal sequence, indicating inconsistent facial geometry typical of synthetic faces.
- **Synthetic Voice (HIGH):** The voice track exhibits characteristics consistent with text-to-speech or neural voice cloning rather than a live recording.
- **Voice Authenticity (MEDIUM):** Pitch contour and spectrogram features do not match natural speech patterns for the apparent speaker, suggesting audio synthesis or splicing.
- **Anti-Spoofing (HIGH):** Anti-spoofing neural network assigns low confidence to bona fide speech, indicating the audio is likely non-genuine or heavily processed.
- **Lighting Consistency (MEDIUM):** Lighting on the face and background shifts unnaturally between frames, suggesting compositing or generative synthesis rather than a single capture.
- **Shadow Geometry (MEDIUM):** Shadow direction and softness are inconsistent with the scene light source, a common artifact in deepfake and face-swap videos.
- **Color Grading (MEDIUM):** Skin tone and color grading do not remain consistent across frames; color boundaries and shadows appear imperfect relative to natural video.
- **Temporal Stability (MEDIUM):** High-frequency flicker and temporal instability detected at facial boundaries, consistent with frame-wise generative manipulation.
- **Facial Boundaries (MEDIUM):** Visible artifacts at the jawline, hairline, or face perimeter suggest blending of a synthetic face onto an original body.
- **Analyst Observation (MEDIUM):** Dummy run: lip-sync mismatch; inconsistent lighting and shadows on face.
